

Brain Station 23

Dhaka, Bangladesh

Job Title: Senior Flutter Developer

Vacancies: 2

Office Time: SUN - THU: 11 AM to 8 PM

Location: Mirpur DOHS, Dhaka, Bangladesh

Job Type: Full Time, On-site

Deadline: 07 Apr, 2026

Description

We are seeking experienced **Senior Flutter Developers** to design, develop, and maintain **secure, scalable mobile applications** for the Fintech industry. You will contribute to building financial products such as **digital wallets, payment systems, lending platforms, and banking applications** for a diverse user base.

Your primary responsibility will be developing **high-quality cross-platform mobile applications** using Flutter and integrating them with **secure RESTful APIs, payment gateways, and cloud services**. You will work closely with cross-functional teams to deliver **reliable, compliant, and high-performance** Fintech solutions, with a strong focus on **security, clean architecture, and performance optimization**.

Job Responsibilities

- Translate Fintech product requirements, UI/UX designs, and wireframes into high-quality Flutter code.
- Design, build, and maintain **secure, scalable, and high-performance** mobile applications for financial use cases.
- Integrate mobile applications with **RESTful APIs, payment gateways, authentication services, and third-party financial services**.
- Participate in the **end-to-end product lifecycle**, including requirement analysis, solution design, development, testing, deployment, and post-release support.
- Ensure application performance, reliability, responsiveness, and **data security**.
- Implement secure authentication, authorization, and data encryption mechanisms.
- Identify performance bottlenecks, fix bugs, and improve application stability.
- Maintain clean code architecture, documentation, and automated testing standards.
- Resolve complex technical challenges and contribute to continuous innovation in Fintech products.

- Collaborate with cross-functional teams to define, design, and deliver new features aligned with business and regulatory requirements.
- Ensure compliance with industry best practices and financial security standards.

Skill Requirements

- **5-7 years** of hands-on experience in Flutter mobile application development.
- Strong understanding of the **mobile application development lifecycle**, especially for Fintech products.
- Experience with **secure mobile application development** and handling sensitive financial data.
- Solid knowledge of mobile memory management and performance optimization.
- Proficiency in writing **maintainable, testable, and scalable code**, including API integration and unit testing.
- Hands-on experience with Flutter **state management** solutions such as **BLoC, GetX, Provider**, etc.
- Experience working with **external data sources, RESTful APIs, and third-party SDKs** (payment, KYC, analytics).
- Knowledge of **dependency injection and clean architecture patterns**.
- Experience with **version control systems** such as Git.
- Experience deploying and maintaining applications on both **Google Play Store and Apple App Store**.
- Strong analytical, problem-solving, and debugging skills.
- Excellent interpersonal and communication skills.
- Passion for learning new technologies and staying updated with Fintech trends.

Educational Requirements

- **B.Sc. / M.Sc. in Computer Science, Software Engineering**, or a related field from a reputed university.
- An equivalent combination of education and relevant professional experience may also be considered.
